

E-TES: The Hot Little Sister

E-TES is the small flood hero for quick drying!

E-TES

Air mover
not included

Fast and Profitable

Get in with a quick set-up, work your magic, and get out equally as fast. E-TES is an electric stand-alone version of the TEX box from the original TES. You can use one unit at a time as a stand alone heat dryer for the small job, or supplement a larger loss to target the tough area, or just add more heat.

Features

- 50 foot Heavy Duty 30amp GFCI (Ground Fault Circuit Interrupter) Power Cord with 3-prong and a 4-prong adapter for Dryer Plugs
- Adapters available for 3-prong and 4-prong Range outlets
- Panel Lights indicate power and safety switch status
- Safety Switches include:
 - Air Flow Switch
 - Dual Hi-Limit Temperature Switches
 - Safety Shutdown Temperature Switch
 - Ground Fault Circuit Interrupter

Simple

- Plug into any dryer or stove outlet (220-240 volt)
- Add any centrifugal blower
- Turn it on and dry with hot, dry air
- Dry carpet, pad, and walls all at the same time
- Dry inside walls and ceilings with hot, dry air, with the addition of an Octidry
- Dry hardwood floors and crawl spaces
