

Another Breakthrough From the creators of **tes**. The World's Fastest Drying System!

Air mover
not included

e-tesTM
electric thermal energy system

*e-tes is the small
flood hero for quick
drying!*

Supplemental drying for large losses or stand alone for small ones. You need to get in with a quick, efficient set-up, work your magic, and get out equally as fast. Because e-tes is an electric stand-alone version of the tex box from the original tes, you can use one unit at a time to speed the drying on all types and sizes of flooded property.

Features

- 50 foot Heavy Duty 30amp GFCI (Ground Fault Circuit Interrupter) Power Cord with 3-prong Dryer Plug
- Includes adapter for 4-prong Dryer outlets
- Adapters available for 3-prong and 4-prong Range outlets
- Panel Lights indicate power and safety switch status
- Safety Switches include:
 - Air Flow Switch
 - Dual Hi-Limit Temperature Switches
 - Safety Shutdown Temperature Switch

Simple

- Plug into any dryer outlet (220-240 volt)
- Add any centrifugal blower
- Turn it on and dry with hot, dry air
- Dry carpet, pad, and walls all at the same time
- Dry inside walls and ceilings with hot, dry air
- Dry hardwood floors and crawl spaces

Specifications

21,000 Btu 240vac Electric Model	
Height:	19-7/8"
Length:	24"
Width:	20-5/8"
Weight:	39 lbs.
Heater watt rating:	6200 watts
Maximum Amp Draw:	25.83amps
Five year housing warranty	
One year component warranty
